

\$1 per Hp Rebate

Electricity cost is an expense you can control. Many manufacturing operations tend to ignore the opportunity to save money on their electricity bill by using premium efficient motors and adjustable speed drives. Deciding which motor and drive to use when replacing old products can be a tough choice. Baldor can help make that decision easier than ever.

Now through December 31, 2004, purchase a 20 Hp or larger Baldor Super-E® premium efficient motor or "H" Series inverter or vector drive from an authorized Baldor distributor and receive a \$1 per Hp rebate directly from Baldor. No fine print. No strings attached.

Your electricity provider may offer additional incentives for installing new premium efficient motors and drives.

For complete details, contact your local Baldor distributor or Baldor office.

It Pays ... to Buy Baldor Super-E[®] Motors and Drives

Rules of Promotion:

Enclose a copy of the distributor's invoice showing the sale of the Baldor Super-E[®] motor, 15H or 18H control.

Fill out and send in the rebate request form below, or a copy which can be obtained from your authorized Baldor distributor, Baldor District Office, or online at www.baldor.com.

Check will be mailed from Baldor Fort Smith to the "sold to" address on the invoice of the end-user company listed on the distributor's invoice.

Distributors will receive a rebate check for \$0.25 per horsepower, when the rebate request form from the end user is received.

For additional information, contact your local Baldor District Office.
