RENEWAL PARTS

DODGE® COMBINATION TIGEAR REBUILD KITS

Rebuild kits consist of all high wear internal components that are routinely replaced when servicing a reducer and provide several benefits when stocked as spare parts at a user location.

- Protection from excessive down time that can occur following unexpected equipment shut-down
- Parts on hand for routine scheduled maintenance
- Packaged kit may be dedicated to a specific machine - No searching for service components

Note: Rebuild kits in following charts contain items to service both current and previous generations of Combination Tgear. Customer may discard those items in kit that are not in use.
