

ABB District Offices

Your local motor provider

The right products are important to successful applications. The right partner is critical. ABB District Offices are located across the United States so we can be the best partner to you, our customer. Being close means that we can provide the inventory, availability, local sales and support, and personal service our customers have come to expect from us.

BALDOR • RELIANCE

Your partner for motor solutions

In 1920, we set out to “build a better motor,” defined as one that used less electricity. Now, a century later, we continue our focus to be the best “as determined by our customers.”

Being the best means more than providing you the best motor possible, it also means being your local partner with engineering expertise, customer service and inventory.

The trusted leader in the industry

Baldor-Reliance® motors are manufactured in U.S.-based facilities that utilize world-class manufacturing and logistics processes to provide quality motors that keep you up and running.

Products you need, when you need them

Inventory mix of ABB and Baldor-Reliance motors strategically based on local market/ industry needs so you have the motor you need, when you need it.

The District Office advantage

24 warehouses and sales offices are located throughout the United States to be your local partner for ABB IEC and Large AC motors, ABB services and Baldor-Reliance NEMA motors.

Customer service

24/7 customer service ensures that whenever you need support, we are there.

Technical & engineering support

Engineering teams provide technical expertise so that you get the right motor for your application.

Training

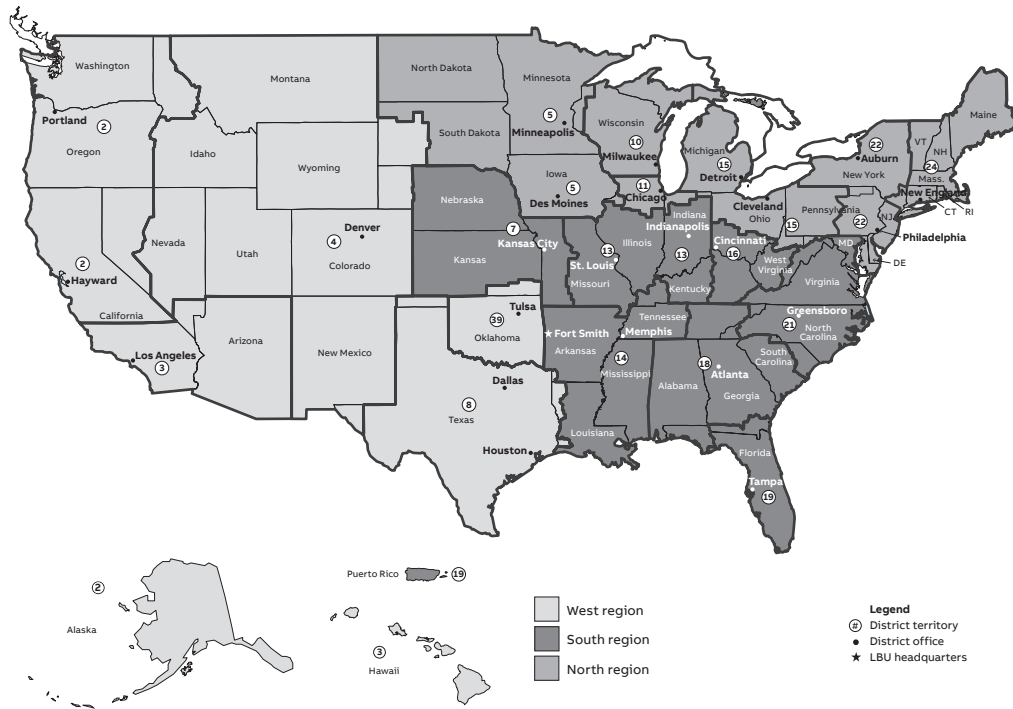

On-site and classroom training to keep you performing to the best of your ability.

Industry expertise

Industry teams focused on the unique challenges that you face in the industries in which you operate.
