

MECHANICAL POWER TRANSMISSION

# Dodge Lifecycle Solutions

Your partner for the life of your products

Dodge brand products represent over 100 years of experience in designing and manufacturing innovative mechanical power transmission products. The Dodge Lifecycle Solutions team partners with you for the entire life of your products.

## Your partner in service

The Dodge Lifecycle Solutions team supports the complete line of Dodge mechanical products.

### Remanufacturing services

Products designed, built, and remanufactured by the name you trust.

### Field services

Factory trained service technicians are available to assist and supervise in installation, commissioning, on-site diagnostics and troubleshooting Dodge products.

### Training

Customized training on-site or at the Greenville, South Carolina service center to ensure your success.

### Customer service

24/7 dedicated customer service and technical support teams

## Remanufacturing

The Dodge Lifecycle Solutions team offers remanufacturing of Dodge mechanical products using OEM parts and built to factory specifications by factory employees. All remanufactured products have a new factory warranty.

## Lifecycle support

Field service technicians are available throughout the product lifecycle to keep you up and running:

- Installation assistance/supervision
- Commissioning and start-up
- Breakdown and emergency support

## Long term storage

Dodge products can be packaged for long term storage at your facility. This includes:

- Rust inhibitor on all external bare metal
- Internal vapor barrier added to the gearcase
- Product is sealed inside a VCI bag with desiccant packs to absorb any moisture that may enter the VCI packaging

### Spares and replacement parts

The Lifecycle Solutions team supplies genuine spare parts and parts kits for Dodge products. As we are the original equipment manufacturer, you can rely on us to supply the correct part. We can also assist with rationalizing your on-site spare part stocks.

### Key benefits:

- All necessary parts available from a single source
- Able to identify and supply original factory parts
- Increased productivity and minimized downtime due to on-hand stock of common replacement parts for immediate shipment
- Part kits available for on-site maintenance and repair

### Training

Classroom training focuses on giving you the skillset you need to properly select, install, troubleshoot, and maintain Dodge products. All training programs are customized to your request and include instructor led guidance with working hands on demos and specialty tools with work site personnel. Training is available at all stages of the product lifecycle.
