

DODGE

Oilfield heavy duty V-belt sheaves

Adaptable. Reliable. Ready to ship.

Adaptable

- Design your drive in seconds at dodgepassport.abb.com
- QD hubs provide simple interchangeability.
- Easy installation and replacement.

Reliable

- Engineered to meet or exceed MPTA standards.
- Manufactured and balanced to precise tolerances, resulting in extended belt life.
- Protected by corrosion-resistant coatings making them more resistant to rust and paint chipping.

Ready to ship

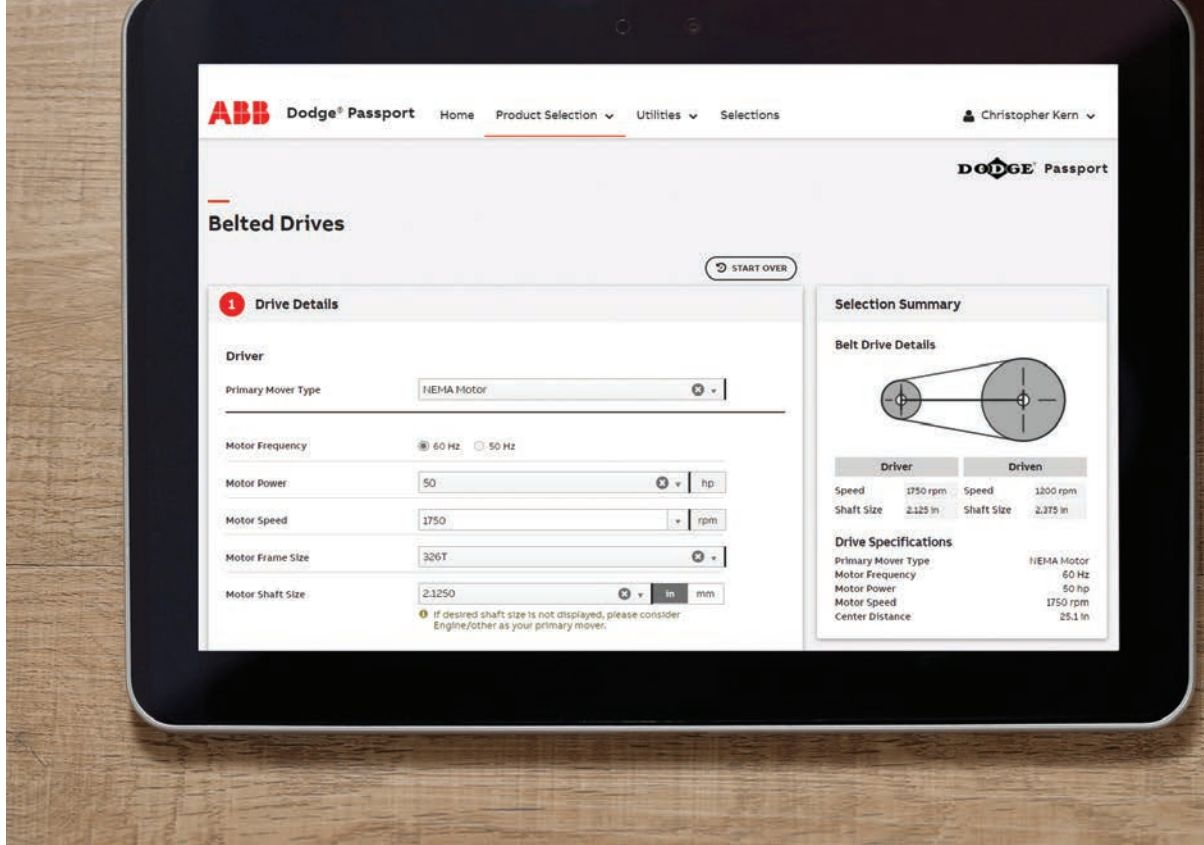

- A variety of common and uncommon oilfield sheaves in stock.
- 3-inch to 63-inch diameters
- 5V, 8V, C, and D profiles

Key applications

- Centrifugal pumps
- Rotary pumps
- Pump skids
- Pumpjacks
- Oil jacks
- Mud pumps

Dodge heavy duty QD sheaves are engineered & manufactured to perform reliably & safely in nearly any environment. With a broad range of sheave profiles, groove counts, & outer diameters, Dodge is available to meet your needs. Coupled with our Passport belt-drive selection tool & industry-leading 24/7 customer support, Dodge products are here to keep you running.

Dodge Passport and QD bushings

Dodge Passport is your one-stop shop for selection, design, and engineering. Design your drive in seconds at dodgepassport.abb.com

Dodge QD bushing systems provide easy, damage-free installation and removal of components from your application's shafting. Dodge QD bushings run concentric, meaning no shaft wobble and minimal shaft wear, extending the life of connected components.
