

FOR QUANTIS® ILH, MSM & RHB

Among the factors that contribute to the performance and overall service life of a reducer, selection and use of the proper lubrication is very important. DODGE QUANTIS reducers are factory filled with Mobilgear 600 XP220 which is a high performance mineral oil lubricant with special additives for use in industrial gear products. Changes in the mounting position will require relocation of the oil level and vent plugs.

Different types of oil should not be mixed. If a change to another type or brand of lubricant is made, the existing lubricant should be drained and the gearcase flushed with a small quantity of the new lubricant before refilling with the new lubricant. This is necessary to avoid possible incompatibility problems between the two lubricants.

Under normal operating conditions, the initial factory fill is good for up to 10,000 hours or three years service, whichever comes first. If a synthetic lubricant is used, this period can be extended to 20,000 operating hours or six years. Harsh environments will require more frequent oil changes. Refer to the product installation and instruction manuals for detailed instructions.

ISO Grade	Lubricant Type	Volume	Ordering Part Number
150	Synthetic	Quart	41170966AP
		Gallon	41170966AR
220	Mineral w/ EP Additives	Quart	41170966AK
		Gallon	41170966AL
	Synthetic	Quart	41170966AU
		Gallon	41170966AV
320	Synthetic	Quart	41170966AY
		Gallon	41170966AZ
460	Synthetic	12 Oz	41170966AB
