

Dodge® Speed Reducers

For the complete installation and parts replacement manual for Dodge speed reducers go to: www.dodge-pt.com/ and select “Dodge Instruction Manuals and Literature” then “Instruction Manuals” and download the appropriate manual.

Important: Dodge Torque-Arm (except ABHS reducers) and Maxum speed reducers are shipped without oil.

It is necessary to add the proper amount of oil before operation. The easiest and safest option is to use a pre-packaged Dodge Endorsed Lube Kit. Refer to the selection guide listed on the reverse of this card. You can also select your own high grade petroleum base rust and oxidation inhibited or synthetic hydrocarbon gear lubricant. See oil tag and reducer manual for more information.

Lube Kits for Dodge Reducers

Lube Kits are now available for all current TXT/HXT – H/ SCXT & TA II Dodge Reducers. To select kit part number just prefix the reducer size with “LUBEKIT” and you are done (Example - TXT5B = LUBEKIT**TXT5**). Refer to the tables on the reverse of this card for Kit Part Numbers. Use this kit part number to inquire on PTPlace.com for pricing and availability.

Lubekits contain Dodge factory recommended lube and provide the security of meeting performance and warranty standards. Each kit has sufficient volume of oil for all recommended mounting positions.

Aerosol Touch-Up Spray Paint

To restore damaged paint order Dodge part number **810001**. Touch-up paint is a 12 oz aerosol spray can of original Reliance Blue-Green enamel.

⚠ WARNING

Because of the possible danger to persons(s) or property from accidents which may result from the improper use of products, it is important that correct procedures be followed. Products must be used in accordance with the engineering information specified in the catalog. Proper installation, maintenance and operation procedures must be observed. The instructions in the instruction manuals must be followed. Inspections should be made as necessary to assure safe operation under prevailing conditions. Proper guards and other suitable safety devices or procedures as may be desirable or as may be specified in safety codes should be provided, and are neither provided by Baldor Electric Company nor are the responsibility of Baldor Electric Company. This unit and its associated equipment must be installed, adjusted and maintained by qualified personnel who are familiar with the construction and operation of all equipment in the system and the potential hazards involved. When risk to persons or property may be involved, a holding device must be an integral part of the driven equipment beyond the speed reducer output shaft.
